Preface

"Multiple sclerosis (MS) is a demyelinating disease in which the insulating covers of nerve cells in the brain and spinal cord are damaged.

A demyelinating disease is any disease of the nervous system in which the myelin sheath of neurons is damaged.

Multiple sclerosis is the most common immune-mediated disorder affecting the central nervous system. An immune disorder is a dysfunction of the immune system. The cause of MS is unknown; however, it is believed to occur as a result of some combination of genetic and environmental factors such as infectious agents. "

https://en.wikipedia.org/wiki/Multiple_sclerosis

https://en.wikipedia.org/wiki/Demyelinating_disease

1) The nervous system : According to the Hamburg School of Astrology : ☉/♀

2) The immune system : ☉/♂

3) Infection : According to the Hamburg School of Astrology : ♂/♄ = ☉

Multiple sclerosis can cause a variety of symptoms. Because of this, the planetary pictures may be different from person to person.

Main planets for MS are ☉, ♀, ♂ and ♄. These planets must be connected to each other. If the person has psychological problems or depressions, ♅ also comes to these planetary pictures.

Multiple sclerosis :

♀/♂ = ♀/♄ = ♂/♄ and/or ☉ = ♀ = ♂ = ♄

Used :

1-Astrology Software :

a-Zet Astrology Software

b-Nova Chartwheels₁ (alabe.com)

2-Sidereal zodiac (Krishnamurti Ayanamsa), Mean Node.

23°45'56" for Year 2000. Speed of precession is 50.2388475.

Secondary Progression : 1 sidereal day = 1 sidereal year

3- Harmonic 16,64,256 and 1024

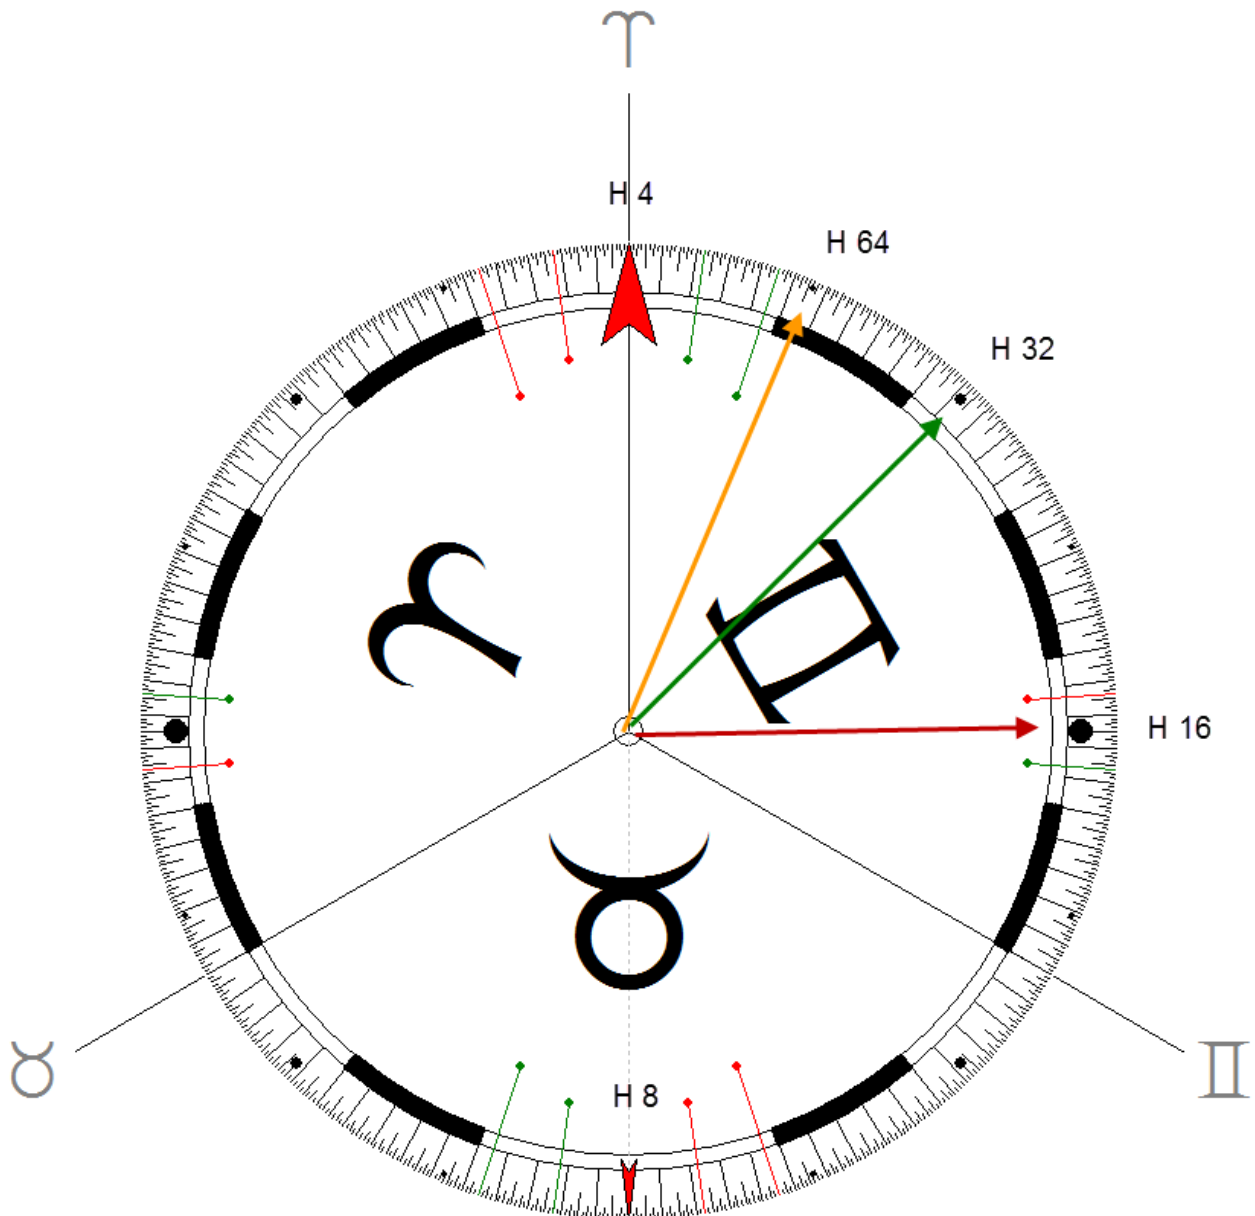

Normally, when looking for any axis for an event or for a specific topic, one should examine harmonic 16,64,256,1024 and 4096,so that you have examined all 2^n harmonics.For harmonic 4096 you need birth times that are accurate to the minute.In this work, the birth times are not checked whether they are accurate to the minute or not.That's why harmonic 4096 is not used.

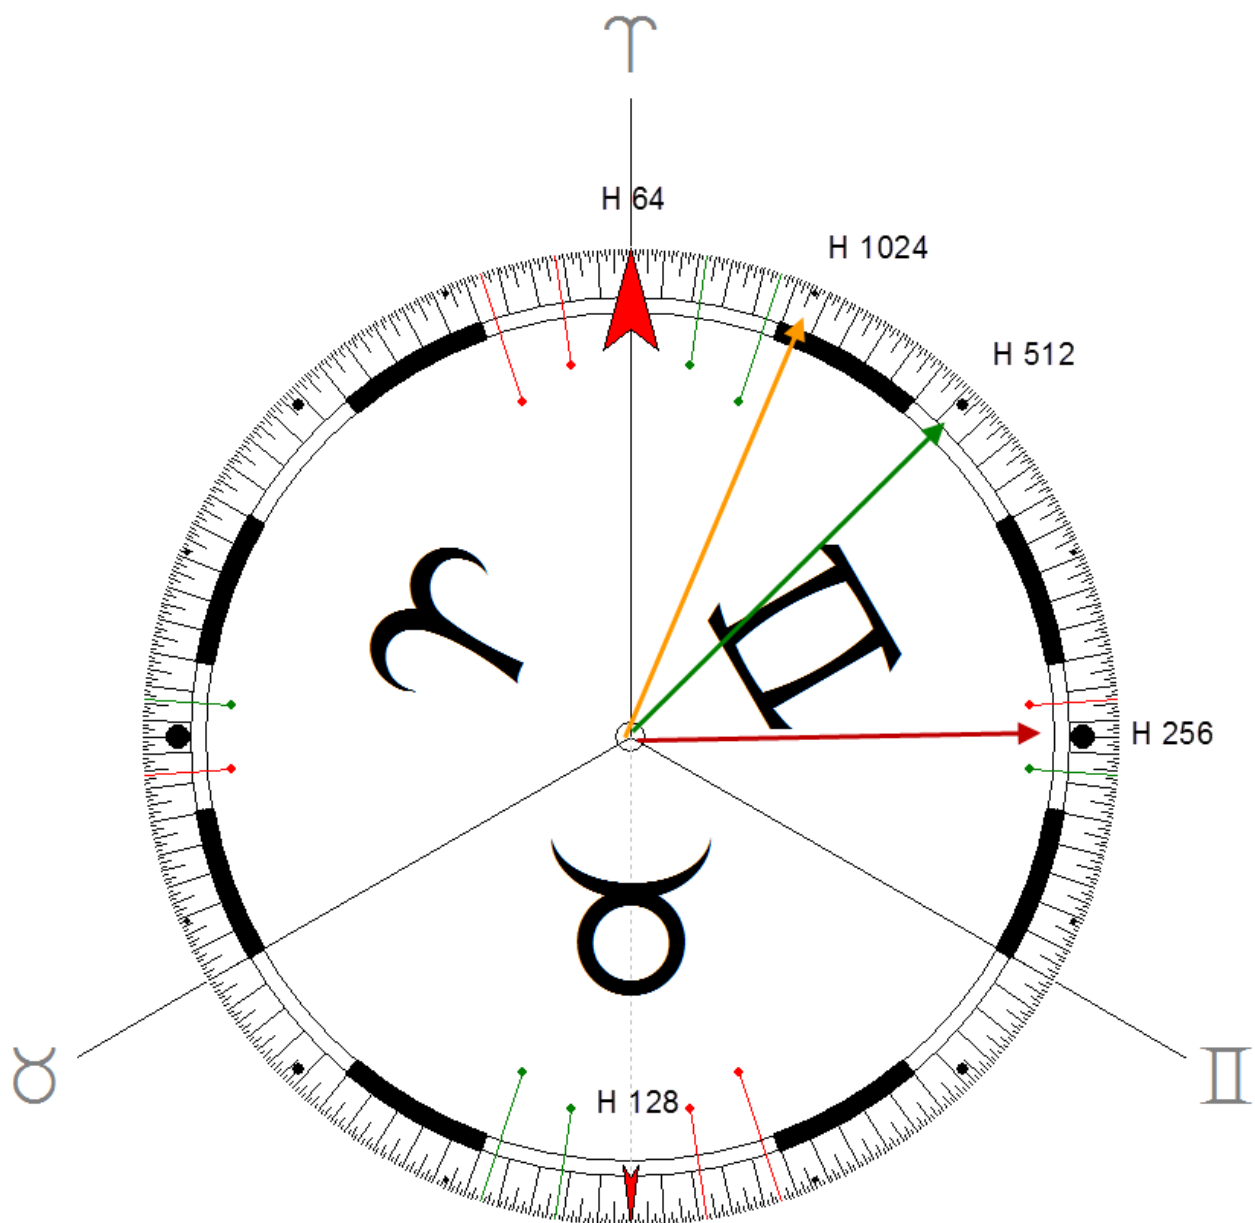

For the persons of whom the birth time is unknown, the birth time was taken 12 o'clock and examined with harmonic 16.

Nova Chartwheels : I would like to introduce Nova Chartwheels here. Nova is very helpful for the presentation of 2^n Harmonics , because you can see other harmonics points very well with additional black dots.

Picture below shows Harmonic 4 (90° Dial).

Opposition point of H 4 is the harmonic 8,
square position of H 4 is H 16,
exactly between H 4 and H 16 is H 32
and between H 4 and H 32 is H 64.

Picture above shows Harmonic 64 (5° 37' 30" Dial).

In this work I used Nova Chartwheels only for Natal positions, because with Nova you can not use a user progression rate and the returns can not be represented as a bi-wheel.
